Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - *who are they?*	Describe the customer and their attributes here
I'm trying to	*List their outcome or "job" the care about - what are they trying to achieve?*	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way – *what bothers them most?*	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists – *what needs to be solved?*	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view – *how does it impact them emotionally?*	Describe the emotions the result from experiencing the problems or barriers

Example:

Problem	I am	I'm trying to	But	Because	Which makes me feel

Statement (PS)	(Customer)				
PS-1	Dr. Sarah Mitchell, an energy policy consultant	design fair and sustainable fuel tax and subsidy policies for governments	I cannot easily compare how countries and regions tax and subsidise fuel	tax, subsidy and price data is spread across 84 countries, several fuel types and many years	uncertain, and unable to back my recommendations with clear evidence
PS-2	Marcus Thompson, a global supply chain manager	cut fuel costs and plan procurement across several continents	I cannot see which regions are cheapest or how risky and volatile prices are	price data is not organised by region, over time or with a forecast	anxious about sudden cost spikes and unsure when and where to buy fuel
PS-3	Prof. Elena Rodriguez, an energy economics researcher	find out how income level relates to fuel taxes, subsidies and prices	I cannot quickly tell whether wealthier countries tax fuel differently	the patterns across income groups are hidden in thousands of records	curious but cautious, because weak evidence would weaken my research
