Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to helps teams better understand their users.
Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Empathy maps for the three personas:

Reference: https://www.mural.co/templates/empathy-map-canvas

Persona 1: Dr. Sarah Mitchell (Scenario 1)

SAYS

- Which countries tax fuel the most, and why?
- I need evidence I can show to government bodies.
- Do subsidies really keep pump prices down?

THINKS

- Tax rules differ so much that fair comparison is hard.
- A wrong recommendation could hurt citizens or the budget.
- Policy must balance growth and the environment.

DR. SARAH MITCHELL

(Energy Policy Consultant)

DOES

- Compares fuel tax rates across countries and regions.
- Reviews subsidy levels against pump prices.
- Prepares recommendations for ministries and stakeholders.

FEELS

- Under pressure to justify every number.
- Frustrated by scattered, inconsistent data.
- Confident when the evidence is clear and visual.

Persona 2: Marcus Thompson (Scenario 2)

SAYS

- Where is diesel cheapest for my routes?
- Price swings are wrecking my transport budget.
- Where are prices heading next year?

THINKS

- Buying fuel at the right time and place can cut costs.
- Volatile markets mean higher risk for my contracts.
- I cannot plan without a forecast.

MARCUS THOMPSON

(Global Supply Chain Manager)

DOES

- Compares fuel prices across regions and countries.
- Tracks diesel price trends over time.
- Plans fuel procurement and logistics routes.

FEELS

- Anxious about sudden price spikes.
- Stretched between low cost and good service.
- Relieved when risks are visible early.

Persona 3: Prof. Elena Rodriguez (Scenario 3)

SAYS

- Do richer countries tax fuel more?
- How do subsidies affect affordability in developing economies?
- I want patterns I can publish.

THINKS

- Income level may shape tax and subsidy strategy.
- Findings must be solid enough for peer review.
- Development bodies need insights they can act on.

PROF. ELENA RODRIGUEZ

(Energy Economics Researcher)

DOES

- Compares tax, subsidy and price by income group.
- Looks for patterns across 84 countries and 7 regions.
- Writes findings for academic and development audiences.

FEELS

- Curious about hidden patterns.
- Cautious about drawing weak conclusions.
- Motivated when the data supports a clear story.
