Project Name	Global Fuel Prices & Taxation Analysis Dashboard
Maximum Marks	2 Marks

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage. The customer here is a stakeholder (policy consultant, supply chain manager or energy researcher) using the dashboard.

Phase of Journey	Stage 1: Discover & Load Data	Stage 2: Explore & Visualise	Stage 3: Interpret & Decide
Actions *What does the customer do?*	• Opens the dashboard • Reads the scenario and problem statement • Selects year and region filters	• Looks at maps, trends and heat maps • Compares regions, income groups and subsidy levels • Clicks a region to filter other charts	• Notes patterns for their scenario • Shares findings with stakeholders • Uses insights for policy, procurement or research
Touchpoint *What part of the service do they interact with?*	• Dashboard landing page • Scenario section headers • Year and region filters	• Tax map and diesel trend with forecast • Heat map and ranked bars • Tooltips and click-to-filter actions	• Insight text boxes • Tableau Public link and video walkthrough • GitHub documentation
Customer Thought *What is the customer thinking?*	• Where do I start with so much data? • Is this the right view for my question?	• Which regions stand out? • Do subsidies really change prices?	• Can I trust these numbers? • What action should I take?
Customer Feeling *What is the customer feeling?*	Curious but a little overwhelmed	Engaged as patterns appear	Confident and ready to act
Process Ownership *Who is in the lead on this?*	Data analyst (dashboard owner)	Data analyst with the stakeholder	Stakeholder (decision maker)
Opportunities *How can we improve this stage?*	• Add a short guide to what each chart answers • Keep filters simple	• Add more tooltips • Add more drill-down options	• Add key insight boxes per scenario • Offer export options
